

You do recal that the oath of political or millatary service requires that all those taking such jobs swear to protectet and defend the constitution of these United States SO HELP YOU GOD!

Artical 1 of the amendments section states that you shall made no law abriging the freedom of speech or of the press. But now free speech is to expensive. The very priciples that this amendment was sopossed to protect. This was to be a guarantee for free expression of the people. Just as when they wrote the 2nd amendment they did not anticapate he machine gun. When they wrote this one they did not know how technolagy would make the media landscape explode. Now with five companys that already control almost all the commercial radio and tv and major news papers. Since deregulation of the first four laws in the communications act of 1934 the maximum # of tv stations a single company can own in a given local market is now 8 same with radio. Please recal that the act of 1934 requires the f.c.c. to ADVANCE THE PUBLIC INTEREST NESSESSITY AND CONVIENCE OF MANAGING THE PEOPLES PUBLIC PROPERTY, THE AIRWAVES. I would like to see this law lived up to. I have a satlite system with over 170 channels but I can only get based in fact in context and objective news on 2 of them. An imformed democracy will behave in a responsible manner-Thomas Jefferson. Don't let us be ill imformed any longer stop total deregulation and consider reinstating the four old rules.

May God be with you brothers and sisters as you struggle for the good of the human family across the globe
